

REPORT 4 CONCERNING ERGIN SALIHI

By Paul Polansky - dispatched on 5th May 2009

On 28th April, Ergin was taken to north Mitrovica hospital. His parents took him there very early in the morning. He has to remain in hospital but at least his parents can now visit him everyday.

On 5th May, we called Dr. Lubijca Radovich in north Mitrovica who is in charge of Ergin in the hospital there. His health is ok for the moment, although he is still in danger. He must remain in hospital for a minimum of six more weeks. For the moment he is doing well, he is taking his medicine and responding. But she is afraid that his illness will return (if he returns to Osterode). If that happens, she won't send him again to Kraguevac hospital but directly to Belgrade. She says there is little hope for him if he is returned to Osterode; she fears the worst for him there. She is praying to God for his recovery but personally she is very afraid for him. I offered to buy a special medicine if there is one but she said there is none.
